SCC

SCC

SCC series machines are highly efficient, reliable and sturdy.

They are designed to be virtually maintenance-free, with performance levels that ensure low running costs as well as vibration- and noise-free operation.

Les machines de la série SCC sont projetées pour garantir hauts rendements, fiabilité et robustesse.

Le design et les performances offrent des coûts d'exploitation et de maintenance extrêmement réduits ainsi qu'un fonctionnement sans vibrations ni bruits.

Le macchine della serie SCC sono progettate per garantire alti rendimenti, affidabilità e robustezza. Il design e le prestazioni offrono bassi costi di esercizio e manutenzione estremamente ridotta, oltre ad un funzionamento in assenza di vibrazioni e rumori.

Pre-configuration for PT100 on both bearing supports, supplied as standard
Adaptation pour recevoir des PT100 sur les deux supports de roulement, de série

Predisposizione per PT100 su entrambi i supporti cuscinetto, di serie

Pre-configuration for vibration sensor, on request

Adaptation pour capteur de vibration, sur demande

Predisposizione per sensore di vibrazione, su richiesta

- Highly efficient
Hauts rendements
Alta efficienza
- Versatile as to installation: double shaft extension supplied as standard
Polyvalence d'installation : double saillie d'arbre de série
Versatilità di installazione: doppia sporgenza d'albero di serie
- Wear rings: can be replaced so as to restore clearances and maintain efficiency over time
Bagues d'usure : remplaçables pour rétablir les jeux hydrauliques et garantir le rendement dans le temps
Anelli sede girante: sostituibili per rigenerare i rasamenti e garantire nel tempo il rendimento
- Double-suction impeller: reduced bearing maintenance
Roue à double aspiration : entretien minimum des roulements
Girante a doppia aspirazione: minima manutenzione dei cuscinetti
- Bearings permanently lubricated with grease and oil
Lubrification des roulements : à la graisse et à l'huile
Lubrificazione dei cuscinetti: a grasso permanente e ad olio
- Sturdy bearing supports and compact, generously sized pump shaft: minimal vibration and extended life of bearings, seals and coupling
Solidité extrême des supports de roulement et de l'arbre de pompe largement dimensionné et compact : vibrations minimum et longue durée des roulements, étanchéités et accouplement
Estrema solidità dei supporti cuscinetto e albero pompa generosamente dimensionato e compatto: minime vibrazioni e lunga durata di cuscinetti, tenute e accoppiamento
- Packing and mechanical seals
Systèmes d'étanchéité : à presse étoupe et mécanique
Sistemi di tenuta: a baderna e meccanica
- Easy maintenance:

 - no need to disconnect the pipes
 - suction and discharge ports in line
 - horizontally sectionable casing*Facilité d'entretien :*
 - sans démontage des tuyauteries
 - orifices d'aspiration et de refoulement en ligne
 - corps démontable horizontalement**Facilità di manutenzione:**
 - senza disconnettere le tubazioni
 - bocche di aspirazione e mandata in linea
 - corpo sezionabile orizzontalmente
